DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I (Claims 1-16) in the reply filed on 1/6/2006 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless – (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-5 and 8-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Gadini (US Patent No. 6,823,878).

Gadini discloses a dishwasher having a heating element that has a resistance, positive temperature coefficient and a control unit coupled to the heating element (col. 4-col. 5; col. 39). Gadini also discusses a preset temperature (col. 39) and therefore this would associate with a target resistance. Gadini also discloses a water supply and valve (see Fig. 1). Gadini

also describes different phases or cycles of the dishwasher which require the preset temperature of the liquid (see entire document; col. 6).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless – (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Khadkikar (US Patent No. 6,085,588).

Khadkikar discloses a temperature sensor (36) in a heating unit (32), which is controlled by a computer device (38).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 7 and 11-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gadini in view of Hoffman (US Patent No. 4,159,211).

Gadini discloses the dishwasher shown above in the 102(e) rejection. Gadini does not specifically disclose the timer controlling the heating element. Hoffman discloses the use of a timer to control the heating element (Abstract). At the time of the invention, it

would have been obvious to one of ordinary skill in the art to modify Gadini with Hoffman for the benefit of easily controlling and adjusting the temperature of the liquid.
